

# Reverse Engineering Worksheet

Name of the machine to be reverse engineered

---

Describe the outside/cover materials?

---

What method and/or tools did you use to remove the cover?

---

---

What internal parts do you recognize and what do they do?

---

---

---

---

Draw some of the components (parts) you don't recognize and offer a hypothesis (an educated guess) as to what part they play in the operation of the machine.
