

# Observation and Classification

**Part 1** - Head outside and sit, stand or walk quietly for 3 minutes. Look, listen and smell. Use your senses to observe all that is around you. After 3 minutes, go back inside and make a list of as many things as you can remember from your observation time.

A series of horizontal lines for writing, consisting of solid top and bottom lines with a dashed midline, repeated multiple times down the page.

Part 2 – Go back outside with your list. You will spend another 3 minutes observing. While you are sitting, standing or walking quietly, write down anything else you observe. Is there anything else you missed the first time?

Handwriting practice lines consisting of solid top and bottom lines with a dashed midline. The first set of lines is partially obscured by an illustration of an ant.

**Part 3** - Sort your observation list, by writing or drawing, into two categories – *living* and *non-living*. Living things need food, water and air. Non-living things do not.

## Living

## Non-living
